

Supporting Strength & Functionality: Herman Miller and Ultraform® POM

BASF, Herman Miller and Cascade collaborate to create the Embody™ Wiffle Back Support

With the introduction of the Embody™ seating system, Herman Miller has once again set the standard for office furniture seating. The Embody™ provides consistent back support when the chair is leaned forward or reclined. This is accomplished in part by BASF's Ultraform® N2640 Z4.

By being processed directly into the technical components of the Wiffle support system, Ultraform® N2640 Z4 is able to combine good sliding-friction and resilience behavior with superb mechanical properties, permitting the Wiffle to back up and support users of the chairs.

The Herman Miller Embody™ Chair with the local seat layer made from BASF Ultraform®POM and Ultramid®.PA6

Utilizing BASF's Ultraform material provides key attributes for this demanding application:

- excellent toughness and dimensional stability
- high strength and stiffness

Application Profile

Although all statements and information in this publication are believed to be accurate and reliable, they are presented gratis and for guidance only, and risks and liability for results obtained by use of the products or application of the suggestions described are assumed by the user. NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE MADE REGARDING PRODUCTS DESCRIBED OR DESIGNS, DATA OR INFORMATION SET FORTH. Statements or suggestions concerning possible use of the products are made without representation or warranty that any such use is free of patent infringement and are not recommendations to infringe any patent. The user should not assume that toxicity data and safety measures are indicated or that other measures may not be required.
