Product/Uses:

The West Memphis site produces a broad range of chemicals, including specialty monomers and polymers for industrial and municipal water treatment. Products manufactured at West Memphis serve the water treatment, adhesives, polymers, coatings, energy, environmental, mining, paint, paper, petroleum, plastics and rubber industries. The site is certified under the ISO 9001:2000 management system.

Community Relations:

- The site supports the West Memphis community by partnering with the Chamber of Commerce's Junior and Adult Leadership programs by providing funding and offering site tours to promote science education and community goodwill.
- It has a partnership established with the local community college to provide program funding and supporting industrial safety and health training for neighboring companies to help develop the workforce of tomorrow.
- The West Memphis site has an active Community Advisory Panel consisting of key stakeholders and opinion leaders from the neighborhoods adjacent to the site.

Economic Impact:

- Annual payroll of \$10 million*
- Payment of \$374,000 in local and state taxes*
- \$1.38 million invested for an analytical and technical service laboratory in 2004
- \$20 million invested on plant upgrades and expansions for production improvements since 1998
- \$32 million invested for environmental and safety improvements since 1998
