

performance loves low VOC

Paints made with our Acronal[®] acrylic latexes, Joncryl[®] emulsions, Pluracoat[®] and Efka[®] additives, Mattex[®] kaolin extenders and attapulgite can be zero to low VOC without sacrificing functionality. And with PureOptions[™] colorants and Xfast[®] stir-in pigments, they can be practically any color.

The performance you need and the sustainability you want: at BASF, we create chemistry.

Visit BASF at the American Coatings Show,
April 13-15, Charlotte, NC.
